**Saving everything to resources
by creating a collection.**

Schoology

Saving everything to resources

- **You can save an archived course or an active course to resources**

I'm teaching the same course at the same school again next year. How do I save and reuse my materials?

You can save your archived course to your **Resources** and reuse the same materials for the next school year, in a new course with new students and a new grading period.

Tip: Create **Collections** in your **Resources** before you start saving course materials.
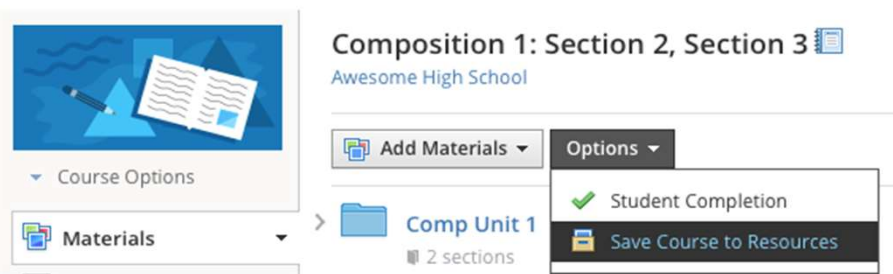

To create a Collection:

1. Click **Resources** in the header.
2. Click the file cabinet icon in the left-hand column to create a new Collection.

▼ My Resources   [▣] ▾

    🗃 Home

To save a course to Resources:

1. Go to the archived course.
2. Navigate to the **Materials** page.
3. Click **Options**.
4. Select **Save to Resources**.

Note: When you save a course to Resources, the following items will not copy: student information, student submissions, Google Drive Assignments attachments, and OneDrive Assignments attachments.

Composition 1: Section 2, Section 3 📘

In the Fall when your new courses are loaded, follow these steps to add in your saved resources. Or you can choose to just reuse a few things.

When you or your system admin create your new course for next year, follow these steps to load all of your saved materials:

1. Click **Materials** in the left menu of the course.
2. Click **Add Materials.**
3. Select **Import from Resources** from the drop-down menu.
4. Select the **Resource Collection** that contains the course content.
5. Check the box to select all items and folders, or select specific items and folders for import.
6. Click **Import** to complete.

Coming to Schoology!!!

WooHoo!!

ELEMENTARY EXPERIENCE

- Simplified navigation for students that will focus on ease of use

- Added features to enhance the Schoology experience or early learners and early readers

- Ability to enable at the course level, so teachers at any building/grade level can enable this experience for their course

- Teacher experience and workflows stay the same

Coming in June!

Elementary Experience

What we're doing

We're making continuous improvements and changes to our LMS offering in order to best serve the Elementary setting and standards, across all user types.

Why you'll like it

We're focusing on ease of use for younger students, parent awareness and communication, and an emphasis on the structure and tools a K-5 teacher depends on.

Topics for next year

1. Go Guardian-
   This is a computer monitoring software for the laptops.   You can see what your students are doing, close and   open tabs and other nifty things.

2. Social Studies-
   We should be getting online codes to preview material.

3. Discovery Ed upgrades- We now have the Experience   version of DE. Training coming your way! Or you can go   to Discovery Professional Learning and watch the tons   of training videos on your own.

Add your ideas and suggestions for more Tools of Engagement topics in the chat, now!

- One on One teacher coaching
- Time period is for one semester
- Not just for technology (think curriculum, classroom management or strategies)
- May have to use prep time to meet
- We can come model a lesson with your students
- We can help you with Schoology, Microsoft, Classflow, Discovery Education, Powerteacher, Wonders, Reading Mastery, Everyday Math, the new CTI Social Studies, etc.

Instructional Coaching for the 2021-2022 school year

If interested, look for a survey to come out soon!

We are almost to the end of the year! You all deserve a wonderful break. Great job this year. We hope everyone has a relaxing summer!
